-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 5 is objected to because of the following informalities: in line 2, delete the ", " between ginger and oleoresin. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishida et al. (US 2002/0013235 A1).
4. Ishida et al. teach the compound below, wherein R represents a C₁₋₆ alkyl. The compound may be used to enhance cooling flavors (Abstract).

u

A preferred embodiment of the invention is vanillyl-n-butyl ether [0008]. This is the same compound of Applicants claims 2 and 4.

5. The compound may occur in combination with saccharides (sweetenings) or inorganic salts (salty seasonings), as well as flavors and spices. Spices specifically taught include capsaicin and other warming spices, as well as cooling compounds. The compound may be included in foods and drinks [0027], [0032]. A method incorporating the flavor enhancer in foods and beverages is taught in example 8.

6. The claims to a flavor enhancer and a method for enhancing the flavor occur in the preamble. As the intended use of the compound as a flavor enhance does not impart any structural difference to the claimed compound, the compound of the prior art is considered to meet the instant claims to a flavor enhancer and a method for enhancing the flavor of a food or beverage. The prior art anticipates Applicant's claims 1-9.

7. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kumamoto et al. (US 2002/0119231 A1).

8. Kumamoto et al. teach the compound below for inclusion in foods and drinks

They specifically teach the embodiment where R^7 is 4 carbon atoms, vanillyl butyl ether [0030], [0031].

9. The compound may be used in foods and drinks in combination with a large number of flavorings and spices, as well as sugars. Though not specifically taught as salty or umami flavors, meat extracts are included in the flavors for inclusion in the foodstuff. Other flavors specifically taught include ginger and pepper flavor [0041], [0044].

10. The claims to a flavor enhancer and a method for enhancing the flavor occur in the preamble. As the intended use of the compound as a flavor enhance does not impart any structural difference to the claimed compound, the compound of the prior art is considered to meet the instant claims to a flavor enhancer and a method for enhancing the flavor of a food or beverage. The prior art anticipates Applicant's claims 1-9.
